PAID FOR THE LAND

A Trespasser on State Lands Made to Settle

BY THE LAND COMMISSIONER

A Peculiar Claim Audited on Account of Injuries to a Boy-Other News of the State.

LANSING, April 1 .- Charles Johnson of Rock River, is not likely to trespass upon state lands to any appreciable extent in the future. Last fail he bought two 40s of land from the state, and during the winter he proceeded to take the timber from these and five other 40s in Delta and Alger counties. His action was reported to the state land office, and the state trespuss agent was sent to investigate, and as a result, with a suit for civil damages, and after that a criminal prosecution with the prospect of a term in the state prison in view, he concluded that discretion was the better part of valor and offered to pay the state price of \$4 per acre for the five 40s trespassed up n and pay \$400 besides in the form of penalty. The state swamp land toard today accepted the proportion and the matter was thus compromised.

The state board of auditors today andited a very peculiar claim, which was for the amount of \$125 incurred for nursing and medical attends ace of a boy sent out from the reform school

The boy, aged 10 years, was sent to Muskegon, but the nome to which he was sent not proving satisfactory, the county agent induced a man named Herman Kusig to take the boy.

Shortly after going to Kusig's the boy was taken violently ill with inflamatory rheumatiens, and his condition is such that it will require amputation of one of the legs, and he is otherwise thoroughly disabled. Kusig is a poor man, but has been obliged to devote his entire time to the boy several months, besides paying \$75 for medical attendance.

The board concluded that in justice to him the sum of \$125 should be allowed Kusig.

REPUBLICAN COLLEGIANS.

They Will Organize a Club to Check the Spread of Democracy.

ANN ARBOR, April 1 .- For some years there has been a growing desire among the leading republicans of the country to see perfected an organization among college men of whom the democratic party has been getting more than its share each year.

These men are to be the future leaders in the law, literature and politers of the nation and the importance of keeping republicanism alive in their breasts, bringing them into closer comminnion with the party leaders, and fitting them for active and intelligent participation in politics, and prevent a further growth of inactivity and indifference on these matters throughout the country, is divious to those familiar with the dangers against which our people must guard in order that the interests of pure politics and good government may be preserved and pro-

Steps have already been taken (and committees are now at work) to form a national league of college and university clube and effect the organization of a republican club in each of the leading educational institutions of the These to discuss issues of the day, to be addressed on economic subjects by leading speakers from different states, and to counteract the perniciously active spirit of the democratic

party among these men. On May 17 a national convention will be held at the University of Michigan at which each of the leading colleges of the country will be represented." convention will close with a most elaborate banquet at which Judge Gres-ham, General Clarkson, Major McKin-ley, the Hon. J. Sloat Fassett, the Hon. M. M. Estee, Judge Thurston, Governor Foraker, the Hon. J. C. Barrows, General Alger, the Hon. A. B. Humphrey, General Cutcheon, General Frank Reeder and others are expected to speak.

SHE HAD THE NERVE.

Plucky Mrs. Hubbard Resisted a Bully With a Revolver.

LACOTA, Mich., April 1 .- This village is considerably excited over the action of Frank Hubbard. a brother of Joe Hubbard who is doing time in Jackson. Frame went to the farm of J. J. Hubbard, near here, and attempted to secure a horse from Mrs. Hubbard that he might dispose of it at a sale by Joe's order. Mrs. Hubbard resisted and the bad brother drew a loaded revolver and thrust it into her face. Mrs. Hubbard dared him to fire and then, procuring a shotgun that was un-loaded, drove him from the place. A warrant is out for his arrest.

Unnecessary Seventy.

LANSING, April 1 .- The state board of corrections and charities has made a report to the governor of the result of its investigation of the charges against the Calhoun county poorhouse management. It save, in substance, that the testimony secured has been such as of an incembary. shows that there has been unnecessary severity in the method of inflicting punishment, and that the treatment of inmates has been less humane than should be allowed in an institution of that kind. It is also recommended toat the rule be repealed which pro-hibits inmates from making complaints to the county apperintendents or from having free communication with outside parties without consent of the keeper or the matron. The charges as made are not supported by the testimony taken, but it is believed that the interests of those committed to the institution demand a change in the keeper and the matron.

He is Talking About. To the Wedded and Unwedded: For your schooling I here fully de-tail bacilli disturbances in the frontal alliuses, nose, etc. There are two considerable cavities in

the frontal bone just above the root of the nose. If you piace your hand upon the forehead, between and slightly above the eyebrows, you will feet the elevation in the bone over these cavities. They are very large in some persons. The frontal sinuses are lined by mucous membrane the same as the nose, and are connected with the nasal cavity by a short duct.

AN IMPORTANT PAPER.

It is From One Who Knows What

The ignorantly called nassi catarrh is bacilli inhabiting the frontal sinuses, their excretion defluxes into the posterior nares, above and behind the palate, compelling the patient to rasp, hawk, cough, spit, gag, and sometimes parbreak, and it keeps many blowing their noses and wetting as many as a dozen handkerchiefs per day; some cases of long standing produce deformity of the external nose, others have consequences even more severe, and the specific ulceration of the walls of the nose only too frequently terminates in rotting and loss of its bridge, ethmoid bone and olfactory nerves. Those thus siled lose the sense of smell (and taste may be gone or impaired.) Gan-grene lumps form in the nose and pseudo-membranes exfoliate, which are expelled at intervals. These faise membranes are brownish and frequently bloody. In these cancerations, analysis is defied, and the foul odor embitters the life of the patient, making intercourse disagreeable and fam-Next note other cognates of nasal

Headache and weakness of eyes are common results of nasal disease. It is the usual origin of deafness, by closing the custachian tubes. In many cases the excretion of bacilli invenes down the gullet into the stomach, inducing the most inveterate type of dyspeps'a Elongation of the uvula, chronic en-largement of the tonsils, false resonance of the voice, bronchitis, cancer of the larynx, paralysis of the epiglottis, snoring, frightful dreams, paresis, various forms of insanity, and even absolute suicide, are oftimes occasioned by nasal disease. Always, the so-called nasal catarrh ushers in asthma or pulmonary consumption, should not death previously occur.

He who visits me for professional service learns the nature and origin of his nasal malady. Should he submit to my antidoting process he is sure to lose his nasal disease in 20 minutes. What an achievement is this, and how much better than the blind guesses of the so-called practical man!
